Summary

AI operations and automation specialist with hands on experience building agent platforms, MCP tooling, LLM powered workflows, voice systems, and content pipelines. At SamTech Labs since 2023 I have directed the design and delivery of production systems including multi agent orchestration, custom MCP servers, a voice assistant, automated job search tooling, and media automation. I also run funded proprietary trading and have grown a personal content brand to more than 22,000 followers.

Education

University of Ilorin
BSc (Education), Educational Technology | 2021 to 2025
Second Class Honors, Upper Division

Experience

AI Engineer and Full-Stack Developer, SamTech Labs (2023 to Present)

- Architected AgentStack, a production AI agent platform with multi agent orchestration, tool calling, MCP compatible registry, semantic memory, and automated social publishing
- Built custom MCP servers for desktop automation and third party API orchestration
- Engineered James, a voice assistant with speech recognition, TTS, long term memory, and dual online offline model routing
- Built JobHunter AI, AlphaSignal Engine, OmniRouter, MoneyHacks Store, SchoolHub, and ProLink

Funded Proprietary Trader, Maven Trading Group (July 2025 to Present)

Passed funded evaluation, managed live capital, maintained 12 plus month trade journal

Content Creator and Social Media Manager, Lyka Fashion (2024 to Present)

Multi platform publishing, content planning, performance tracking

Content Creator and Fashion Blogger, Fabulous Ankara Designs (2020 to Present)

Grew personal brand to more than 22,000 followers across Facebook, TikTok, and Instagram

Capabilities
